Reg:2012331028

Project Aim

- To predict women condition in Bangladesh
- To provide statistics on a particular criterion based on news

Objectives

- Crawling some popular newspaper
- Filtering the crawled data
- Developing some equations
- Analyzing the filtered data with respect to the equations
- Getting result

Why This Project is Important?

- To know about the previous condition of women in Bangladesh
- Analyzing the data to build such a system that can provide reports/statistics and predict condition
- To get overall scenario of women in Bangladesh

Project Deliverables

- A brief description on entire project
- Statistics of recent condition generated from the project
- Developed algorithm

Work Plan

- Literature search and review. (1 week)
- Analysis and modelling. (1 weeks)
- System design, coding small test programs and simple prototypes. (2 weeks)
- System implementation. (3 weeks)
- System testing and evaluation. (1 weeks)
- Work on Final Report (1 weeks)
